DIRECTORS' REVIEW

On behalf of the Board of Directors of Habib Metropolitan Bank, I am pleased to present the condensed interim unaudited financial statements for the quarter ended 31 March 2024.

During the first quarter of 2024, Pakistan's economic and financial position continued to improve steadily due to the resumption of funding from multilateral and bilateral partners and prudent policy decisions. The rupee remained stable throughout the period, averaging under Rs. 280/USD. Pakistan successfully concluded the nine-month Stand-by Agreement with the IMF, and discussions are underway for a longer tenure program.

Year-on-year inflation registered at 20.7 percent in March 2024, following a downward trajectory since its peak at 38.0 percent in May 2023. Inflation is expected to maintain a downward trend due to the government's measures to curb inflationary pressure.

The current account posted a deficit of \$508 million in 9MFY24, an improvement from the deficit of \$4,054 million in the same period last year, largely reflecting an improvement in the trade balance and higher workers' remittances. Exports increased by 7.3 percent to \$28.8 billion, while imports declined by 4.3 percent in 9MFY24 due to lower international commodity prices.

The State Bank of Pakistan has maintained the policy rate at 22 percent in its latest monetary policy meeting.

By the Grace of Allah, HABIBMETRO posted a profit before tax of Rs. 11,573 million for the first quarter of 2024, an increase of 15.0 percent year-on-year, translating into after-tax earnings of Rs. 5.63 per share.

Bank deposits increased to Rs. 1,086,684 million compared to Rs. 1,012,303 million as of 31 December 2023, a growth of 7.3 percent. The Bank successfully maintained the current deposits that grew in the last year, closing at Rs. 374,261 million. Investments declined by 2.8 percent to Rs. 899,745 million, whereas net advances increased by 5.5 percent to Rs. 434,568 million during the first quarter.

The Bank's net mark-up/interest income amounted to Rs. 16,345 million, with a growth of 18.7 percent compared to Rs. 13,770 million in the same period last year, whereas non-mark-up/interest income increased to Rs. 3,732 million.

The Bank's Net Equity stands at Rs. 93,361 million with a capital adequacy level of 17.85 percent.

The Bank maintained its Pakistan Credit Rating Agency Limited (PACRA) ratings of AA+ for Long Term and A1+ for Short Term, denoting high credit quality with a low expectation of credit risk, and a strong capacity for timely payment of financial commitments.

HABIBMETRO operates a network of 525 branches in 207 cities across Pakistan, including 208 Islamic banking branches and 187 Islamic banking windows, providing a comprehensive spectrum of banking services and products, including specialized trade finance products and digital banking solutions.

Your Bank is fully committed to fulfil its corporate social responsibilities and continues to make regular contributions to a host of non-profit/social organizations. The Bank also engages its employees in a variety of charitable endeavours and causes, with a major focus on healthcare and education, as part of its efforts to be a socially conscious company.

Your Bank is also accelerating digital transformation by promoting mobile app, web banking, and debit cards

In conclusion, we express our sincere gratitude to the Ministry of Finance, the State Bank of Pakistan, and the Securities and Exchange Commission of Pakistan for their continued support. We also thank our valued shareholders and customers for their trust, the Board of Directors for their guidance, and the staff of HABIBMETRO Bank for their dedication, which enables us to grow from strength to strength.

On behalf of the Board

KHURRAM SHAHZAD KHAN
President & Chief Executive Officer

These unconsolidated financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting. The accounting and reporting standards for interim financial reporting comprise of:

- International Accounting Standard (IAS) 34 "Interim Financial Reporting" issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017;
- International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) as are notified under the Companies Act, 2017;

- Provisions of and directives issued under the Banking Companies Ordinance, 1962 and the Companies Act, 2017; and

3. MATERIAL ACCOUNTING POLICIES

The significant accounting policies and method of computation adopted in the preparation of these unconsolidated condensed interim financial statements are consistent with those applied in the preparation of the audited unconsolidated financial statements of the Bank for the year ended 31 December 2023 except for the adoption of IFRS 9 Financial Instruments w.e.f 01 January 2024.

3.1 Amendments to existing accounting and reporting standards that have become effective in the current period

3.1.1 Impact of IFRS 9 - Financial Instruments

IFRS 9 brings fundamental changes to the accounting for financial assets and to certain aspects of accounting for financial liabilities. To determine appropriate classification and measurement category, IFRS 9 requires all financial assets, except equity instruments to be assessed based on combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The adoption of IFRS 9 has also fundamentally changed the impairment method of financial assets with a forward-looking Expected Credit Losses (ECL) approach.

As permitted by the transitional provisions of FRS 9, the Bank has opted for modified retrospective approach and has not restated comparative figures. Any adjustments to the carrying amounts of financial assets and liabilities at the date of transition were adjusted from general provision held by the Bank without restating the comparative financial information.

3.1.2 Reconciliation of statement of financial position balances from existing local regulations to IFRS 9

The following table reconciles the carrying amounts of financial assets, from their previous measurement category in accordance with existing local regulations to their new measurement categories upon transition to FRS 9 on 01 January 2024.

20.2 Under the Workers' Welfare Ordinance 1971, the Bank is liable to pay workers' welfare fund (WWF) @ 2% of accounting profit before tax or taxable income, whichever is higher. The Bank has made full provision for WWF based on profit for the respective years.

The Supreme Court of Pakistan vide its order dated 10 November 2016 has held that the amendments made in the law introduced by the Federal Government for the levy of WWF were not lawful. The Federal Board of Revenue has filed review petitions against this order which are currently pending.

Legal advice obtained on the matter indicates that consequent to filing of these review petitions the judgement may not currently be treated as conclusive. Accordingly the Bank maintains its provision in respect of WWF.

22.3.1 These mainly represent counter claims by borrowers for damages. Based on legal advice and internal assessments, management is confident that the matters will be decided in the Bank's favour and the possibility of any adverse outcome is remote. Accordingly, no provision has been made in these unconsolidated financial statements.

22.3.2 Foreign exchange repatriation case

While adjudicating foreign exchange repatriation cases of exporters, the Foreign Exchange Adjudicating Court of the State Bank of Pakistan has adjudicated penalty of Rs. 106,056 thousand, arbitrarily on the Bank. The Bank has filed appeals before the Appellate Board and constitutional petitions in the Honorable High Court of Sindh against the said judgment. The Honorable High Court has granted relief to Bank by way of interim orders. Based on merits of the appeals, management is confident that these appeals shall be decided in favor of the Bank and therefore no provision has been made against the impugned penalty.

23. DERIVATIVE FINANCIAL INSTRUMENTS

The Bank deals in derivative financial instruments namely forward foreign exchange contracts and foreign currency swaps with the principal view of hedging the risks arising from its trade business.

As per the Bank's policy, these contracts are reported on their fair value at the statement of financial position date. The gains and losses from revaluation of these contracts are included under "Foreign exchange income". Unrealised mark to market gains and losses on these contracts are recorded on the statement of financial position under "other assets / other liabilities".

These products are offered to the Bank's customers to protect from unfavorable movements in foreign currencies. The Bank hedges such exposures in the inter-bank foreign exchange market.

These positions are reviewed on a regular basis by the Bank's Asset and Liability Committee (ALCO).

34. FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than investment in subsidiaries and those classified as amortised cost / held to maturity, is based on quoted market price. Quoted securities classified as amortised cost / held to maturity are carried at amortised cost. The fair value of unquoted equity securities, other than investments in subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

The fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since they are either short-term in nature or, in the case of customer advances, deposits and certain long term borrowings are frequently repriced.

34.1 Fair value of financial assets

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using input for the assets or liabilities that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

Valuation techniques used in determination of fair valuation of financial instruments within level 2.

Federal government debt securities	The fair value of government securities are valued using PKRV rates.
Debt securities other than federal government securities	The fair value is determined using the prices / rates available on Mutual Funds Association of Pakistan (MUFAP) / Reuters.
Forward foreign exchange	The fair values are derived using forward exchange rates applicable to their
contracts	respective remaining maturities.
Mutual funds	The fair value is determined based on the net asset values published at the close of each business day.

Valuation techniques used in determination of fair values of non-financial assets within level 3.

valuation teeningues used in determination of tail values of non-indirect assets within tevero.						
Fixed assets and non-banking assets acquired in satisfaction of claim	Fixed assets and non-banking assets are valued by professionally qualified valuators. The valuation is based on their assessment of the market value of the assets. In determining the valuation for land and building the valuer refers to numerous independent market inquiries from local estate agents / realtors in the vicinity to establish the present market value. The fair valuation of land and building are considered to represent a level 3 valuation based on significant non-observable inputs being the location and condition of the assets. The fair value is subject to change owing to changes in input. However, management does not expect there to be a material sensitivity to the fair value arising from the non-observable inputs.

Therefore, the requirements of SBP directives that currently provide the accounting framework for the measurement and valuation of investments and provision against non performing financings have been followed till 31 December 2023.

3. MATERIAL ACCOUNTING POLICIES

The significant accounting policies and method of computation adopted in the preparation of these consolidated condensed interim financial statements are consistent with those applied in the preparation of the audited consolidated financial statements of the Bank for the year ended 31 December 2023, except for the adoption of IFRS 9 Financial Instruments w.e.f 01 January 2024.

3.1 Amendments to existing accounting and reporting standards that have become effective in the current period

3.1.1 Impact of IFRS 9 - Financial Instruments

IFRS 9 brings fundamental changes to the accounting for financial assets and to certain aspects of accounting for financial liabilities. To determine appropriate classification and measurement category, IFRS 9 requires all financial assets, except equity instruments to be assessed based on combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The adoption of IFRS 9 has also fundamentally changed the impairment method of financial assets with a forward-looking Expected Credit Losses (ECL) approach.

As permitted by the transitional provisions of IFRS 9, the Group has opted for modified retrospective approach and has not restated comparative figures. Any adjustments to the carrying amounts of financial assets and liabilities at the date of transition were adjusted from general provision held by the Group without restating the comparative financial information.

3.1.2 Reconciliation of statement of financial position balances from existing local regulations to IFRS 9

The following table reconciles the carrying amounts of financial assets, from their previous measurement category in accordance with existing local regulations to their new measurement categories upon transition to IFRS 9 on 01 January 2024.

34. FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than investment in subsidiaries and those classified as amortised cost / held to maturity, is based on quoted market price. Quoted securities classified as amortised cost / held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

The fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since they are either short-term in nature or, in the case of customer advances, deposits and certain long term borrowings are frequently repriced.

34.1 Fair value of financial assets

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using input for the assets or liabilities that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

Forward foreign exchange contracts	The fair values are derived using forward exchange rates applicable to their respective remaining maturities.
Mutual funds	The fair value is determined based on the net asset values published at the close of each business day.

Valuation techniques used in determination of fair values of non-financial assets within level 3.
