DIRECTORS' REPORT TO THE SHAREHOLDERS

Directors' Report to the Shareholders

The Board of Directors presents the un-audited condensed financial statements of the company for the Quarter ended September 30, 2025.

Principal Activity and Operational Performance

Dandot Cement Company Limited is a Public Listed Company primarily engaged in the production and sale of cement. For the year under review, the company produced 111,920 metric tons of clinker. Cement production stood at 115,409 metric tons. Sales during the period reached 115,035 metric tons.

During the period under review, the company recorded gross sales of PKR 2.68 billion (Sep-2024: PKR 2.13 billion) and net sales of PKR 1.72 billion (Sep-2024: PKR 1.39 billion). However, the company incurred a gross profit of PKR 186.230 million (Sep-2024: PKR 135.83 million) and an operating profit of PKR 162.11 million (Sep-2024: PKR 112.14 million). The net (loss) / profit amounted to PKR (17.46) million (Sep-2024: PKR (60.73) million, translating to (loss) / profit per share of PKR (0.04) (Sep-2024: PKR 0.24).

The Company successfully completed its first full year of production after an extensive BMR and is proud of its achievements in terms of recapturing the market, establishing high grade quality and recreating the brand value it once had. The company focused on providing high quality cement to the market and creating sustainable distribution channel to restart customer engagement. The BMR was successful in achieving its desired targets: thermal efficiency, production targets, dust and emission control and improved run factor.

Despite these improvements, the Company reported a loss before tax, primarily attributable to low retention margins per bag and elevated input costs. The substantial rise in cost of raw materials was the main reason for the overall loss. The fluctuation in coal prices also attributed to a muted profitability. We aim to work on all fronts by creating several different options for coal mix and improving the production efficiency metrics to achieve our goals for next year. Waste heat recovery plant will also add significantly to the bottom by saving ~20% on electricity costs.

Due to the losses before tax sustained during the year, the Board of Directors has not recommended any dividend for the period.

Industry Overview and Future Prospects:

Domestic cement: Domestic cement dispatches increased by 15% as compared to the previous year same quarter, reflecting a gradual recovery in market demand. Nonetheless, the industry continues to operate in a challenging economic and political environment. The slowdown in domestic sales volumes observed earlier was mainly due to reduced PSDP spending, the absence of new infrastructure projects, and a significant rise in Federal Excise Duty (FED), royalties, and other industry-related taxes. With the announcement of the new federal budget, the market is expected to regain momentum as infrastructure development remains a national priority to support Pakistan's growing population. Furthermore, improving macroeconomic indicators signal a positive outlook for construction activities in the coming period.

Export Market: In contrast, the export sector displayed impressive growth, with volumes increasing by 21% compared to the previous year. This remarkable rise in exports can be linked to favorable pricing conditions in the international market.

Overall Dispatches: The overall dispatches by the cement industry recorded a modest increase of 16%. This growth was driven by the strong performance in exports, which also increased in local sales.

Principal Risks, Uncertainties & Remedies

Your company faces the following key risks and uncertainties:

- Increasing fuel and electricity prices, leading to higher production costs
- Devaluation of the Pakistani Rupee, which increases the cost of imports like coal.
- Reduced government spending on infrastructure projects, lowering demand for cement.
- Political Instability, leading to higher production costs.
- The gradual improvement in foreign exchange reserves due to loan approved by IMF.

Company's Plan

Subsequent to the commencement of operations after BMR, the management invited proposals for power generation from the waste heat recovery of the exhaust gases of the cement plant. After completion of the technical and commercial evaluation of the received proposals, the negotiation is in process to finalize the agreement. Power generation from the waste heat recovery will reduce production costs through decrease in the purchased electricity consumption. Optimization of the cement grinding operation is also in process to increase process reliability and improve sustainability. To support this endeavor, the company has approached various investors and financial institutions to raise fresh capital to finance this project.

Subsequent Events

All subsequent events have been properly disclosed in the relevant notes to the audited financial statements of the company.

Acknowledgment

The board of directors is thankful to all stakeholders including but not limited to bankers, employees, suppliers, distributors as well as regulators and shareholders for their continued support, cooperation and trust especially in crises tenure faced by the company in the current period.
