FUTURE OUTLOOK

FUTURE OUTLOOK

- Ghani Glass has been playing its vital role in creating job opportunities, saving foreign exchange by producing import substitute, developing the country by fetching foreign exchange, by exporting globally, by using indigenous raw material;
- This year, we successfully resumed operations at one of Pharma Glass's furnaces at our Karachi facility following comprehensive repair and maintenance work. The furnace has also been upgraded to support the future production of Narrow Neck Press & Blow (NNPB) glass bottles, InshaALLAH.
- The installation of new sophisticated and state-of-the-art machinery to improve the quality of glass tableware segment has been completed. Commercial production from the new machinery has been started in October 2025;
- Pakistan, highly vulnerable to climate change, continues to face its severe impact. Following the 2022 flood crisis, another wave of flash floods struck at year-end, intensifying pressure on agriculture, infrastructure, and human capital. The floods have caused widespread displacement, loss of life, and heightened poverty risk. Agriculture—contributing 24% to GDP and employing half the labor force—has been hit hardest.
