Economic Overview

Pakistan's economy shown encouraging signs of recovery in FY-2025, with real GDP expanding by 2.7%. This recovery reflects the effects of strong macroeconomic management, renewed investors confidence and continued support under the IMF's Extended Fund Facility. Inflation declined sharply compared to previous financial year. On the fiscal front, the government recorded a historic primary surplus of GDP during the first two quarters of FY-2025. However, the overall fiscal deficit stood at 6.2% of GDP.

The external sector rebounded impressively; posting a current account surplus of USD 1.9 billion, this turnaround supported by record high remittances, increase in exports. Despite a widening trade deficit of USD 21.3 billion due to higher imports.

The government also initiated pension reforms, transitioning toward a contributory system to address the growing fiscal burden of unfunded pension liabilities. These reforms would enhance long-term fiscal sustainability by reducing pension related expenditures.

The outlook for Pakistan's economy in 2026 is cautiously optimistic, with several positive indicators Stable Inflation, Strong Growth, Resilient Agriculture, Robust Remittances, Strong Stock Market and potential for growth. However, the outlook is not without challenges like, inflation, rising debt, energy shortage and water scarcity continue to create pressure on the economy. This may depends on how effectively the government can manage these challenges while leveraging the positive trends.

SBP, Monetary Policy Committee (Committee) reviewed its policy frequently to take appropriate action towards supporting growth, financial stability and fiscal adjustments. The Committee keeping the view of overall economic situation and inflation declined, cutting the continuing policy rate. This shift helped lower borrowing costs and created favourable conditions for an economic revival. However, the SBP committee in its last meeting held on January 26, 2026, remain the policy rate unchanged to 10.50%.

In the context of improved macroeconomic stability, the capital market registered rising trend during the year under review. The PSX-100 index registered 174473 points at the closing of the year 2025 as compared to 115126 of the preceding year. These gains bolstered by successful IMF reviews and Fitch's credit rating upgrade to B- with a stable outlook.
